CT Brain

Patient Name : cdac pacs Age/Sex : 37 Yr / M Coll./Study Date : 04-Jun-2025
Test Name : CT Brain Ward/OPD : NA Reporting Date : 04-Jun-2025
Dept/Unit : General Medicine Emg

Result

PERIPHERAL CT ANGIOGRAPHY (LOWER LIMB)

Abdominal aorta, bilateral iliac, celiac axis, superior mesenteric artery, bilateral main renal artery appear normal in attenuation and caliber.

Adequate filling of bilateral common femoral artery, superficial femoral artery, Profunda femoris and popliteal artery are seen.

Adequate filling of anterior and posterior tibial, peroneal arteries are seen.

No evidence of luminal narrowing/ occlusion , ectasia , abnormal dilatation , dissection or any vascular malformation noted in visualized arteries.
